NetFAX .. Business Fax Solution

Pleasantly Efficient Faxing

NetFAX .. Business Fax Solution

Eliminate the discomfort and disadvantages of traditional fax machines. Deploy 2Ring NetFAX, a business fax solution that delivers pleasantly efficient faxing.

Ease of Use

Forget company-wide training sessions. With 2Ring NetFAX, the skills necessary for sending a fax message are comparable to those for sending email or printing a document, and thus everyone is ready to use 2Ring NetFAX immediately after its deployment.

Receive as Email

Enjoy the convenience of incoming fax messages delivered to email inboxes. In other words, users receive their faxes as email messages with the actual fax attached as a PDF file or with a link to its location on the 2Ring NetFAX server.

Send as Email

Send faxes directly from your favorite email client. Just email the file that you need to fax to SendFax@NetFAX.Company.com, and enter the recipient's fax number as the subject. All email clients are supported.

Compatibility

Receive from and send to all types of fax machines including analog, ISDN and VoIP faxes.

Fax Directly from CRM, Word, Excel, ...

Utilize the benefits of 2Ring NetFAX Client and send faxes by printing the source file to a virtual 2Ring NetFAX printer from any Windows application (such as MS Word or your company's IS). In the 2Ring NetFAX Client application pop-up window, you can then select 1) the message's recipient (or type in the fax number), 2) the header and footer, 3) the cover page, and if desired 4) a later time at which to send the fax message.

Sign and Stamp Faxes without Printing

Fax invoices and contracts directly from your company's information system with ease. 2Ring NetFAX Client will provide you with fax message preview and allow you to place a picture with your signature and stamp in the proper place. Of course, for documents based on a template, users can just select the proper signature template to be automatically added.

Unlimited Archive (Storage)

Go green and stop buying expensive fax paper. Store up to 5,000 messages using just 1GB of your 2Ring NetFAX server's storage.

Reduce Faxing Costs

Send fax messages from the company's voice gateways closest to the fax's recipient, and thus use the best rate available. Moreover, with 2Ring NetFAX, internal faxes (sent to your sites abroad) will not leave your network at all, which also represents a significant source of savings.

Tight Security

Keep your fax messages under your control. All fax messages received and sent are stored and backed up on your systems. The security and management are completely under your control.

Scalability

Count on 2Ring NetFAX's ability to grow with you. Depending on the hardware used, 2Ring NetFAX is able to serve up to a hundred thousand of users!

Redundancy

Expect the unexpected, and protect your business from hardware failures by using the redundant option.

Zero for "3rd Party Software"

2Ring NetFAX supports a freely available operating systems - Linux Debian and CentOS.

Zero for Hardware

Capitalize on your existing infrastructure. If you already have a standard Linux server / virtual machine and a 2Ring NetFAX compatible voice gateway or exchange, then 2Ring NetFAX does not require any complementary hardware. Thanks to build-in support of multiple faxing protocols (T.37, T.38 and G.711), 2Ring NetFAX smoothly integrates with voice gateways and Cisco Unified Communications Manager.
