

Dashboards & Wallboards ..

Deliver Personalized Information to Every Screen

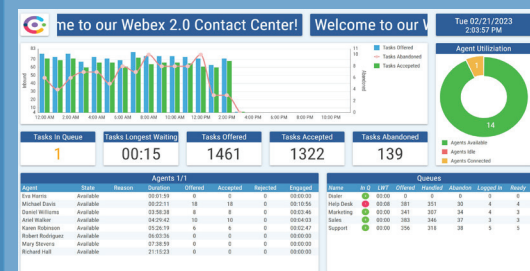

Contact Center Solutions .. #CCTR

Dashboards & Wallboards ..

Contact Center Solutions .. #CCTR

Create an unlimited number of views for mobile devices, PCs, and large TV screens to reach users who are in the office, on the go, or who work from their home office ..

Set thresholds and notifications to get alerted in real-time via email, IM, or a text* message, giving you the ability to take action quickly anytime and anywhere based on data from multiple sources ..

KPIs / Metrics

Build layouts using any of the 270+ available metrics. If a KPI (Key Performance Indicator) is not on the list, you can use the derived KPI feature to mix & match different KPI calculations to build the desired formula. For each KPI, it is also possible to define three value ranges (good, neutral, and bad) based on which the KPI can then deliver alerts and notifications ..

Notification Service

Post information from 2Ring Dashboards & Wallboards (DW) to external systems such as email, text messaging/SMS* or other 3rd party SW solutions or Collaboration Software like Cisco Webex®, Microsoft Teams, Slack, and/or Discord. The service checks rules defined by conditions, and if a rule condition is met it passes the information via the appropriate channel to the corresponding system. Out of the box, the Notification Service sends email notifications around KPI values and calls 3rd party web services to push KPI notifications. In short, this notification service enables integrations of DW with services such as Node-RED, and many 3rd party text messaging/SMS services* ..

External KPIs

Go beyond delivering up-to-date information about your contact center (UCC Express, Enterprise, Packaged, Webex CC). Add business-relevant information from your ERP or CRM (Salesforce dashboards) or even data from your service desk systems (ServiceNow®). You can use either an existing connector from 2Ring, reuse available web-based reports provided by your ERP/CRM/Service Desk system, or develop a custom connector by following the guidelines in our developers guide ..

Alerting

Thresholds can be set for any of the KPIs and grids. Decide what the triggering thresholds should be and have the KPIs change color, blink, play audible alerts (sounds or even custom voice recordings), send out an email or a text message/SMS* ..

Grids / Tables

Grids provide real-time data in a tabular format. These types of views are ideal for displaying statistics for a list of agents, queues, or campaigns. Agent grids show the current agent state for handling calls, emails, and/or chats as well as many individual performance metrics. Queue grids provide queue statistics such as Calls Waiting, Calls Handled, Calls Abandoned, Service Level, and many more. All grids can be filtered and sorted by any of the columns (visible or not) to show, for example, the top 10 or bottom 10 performers ..

External Content

On top of all the real-time and precise data, enrich your wallboards with web-based content, social media feeds (Twitter, Facebook), pictures, stock data, the current weather or weather forecast, PDF files (PowerPoint slides), YouTube videos (including live streams), and more ..

Drag & Drop to DIY

Forget about contacting your IT department to modify a wallboard. Simply do it yourself without hassle. Give it a try in our cloud demo environment, and see how user-friendly and convenient our Dashboards & Wallboards are. Request access at <http://www.2Ring.com/DWWebexCCTrial> ..

Power Tool for the Home Office

Keep your agents in the known even when they are working from home. The Power Tool is a small application that floats atop of other application windows and thus it always stays visible. Agent can resize it to whatever size and move it around the screen as needed. Just like the wallboard in the office, it can show metrics relevant for the team, but since it runs on agent's PC, it can also be set to only show personalized metrics. KPIs can change color, blink, and even trigger audible alerts. If you include a marquee, sending out timely reminders to your agents is very easy and intuitive (and you will have the peace of mind that the message was immediately seen by your agents). Show that you are serious about hybrid work. Bring the comfort of large wallboards to agents' home offices. Visit [2Ring.com/PowerTool](http://www.2Ring.com/PowerTool) to view a brief demo video ..

Available from the 2Ring Cloud & Mobile Friendly

The most convenient way to use 2Ring Dashboards & Wallboards is to go with the 2Ring Cloud subscription. No need for servers, and on the client side, all you need is a browser. There's also no need to install a device specific app. 2Ring supports default browsers on all major mobile devices: iOS, Android, and Windows. Notifications can be sent to external systems. This literally allows you to take your wallboards with you anywhere and have them at your disposal at any time ..

No Limits

With support for an unlimited # of layouts, create the right set of data for every group of users / viewers. Layouts can also be configured into a sequence, and thus flip from one screen to the next automatically ..

Business Units

It is possible to create multiple business units (tenants). Every team has autonomy and gets to manage its own KPIs, grids, and layouts. If needed, it is easy to share already created resources with other business units or provide access to existing layouts for viewing by other users (without having to enter user credentials) ..

Made for Cisco Webex Contact Center

The following connectors are currently available out of the box: Cisco Webex Contact Center (WXCC 1.0 and 2.0), Amazon Connect, Genesys (Engage™ & Cloud CX™), Cisco Contact Center (UCCX, UCCE – including Packaged), Cisco Unity®, Cisco CUCM, ServiceNow®, Salesforce®, Staffline Feedback Service, and Upstream Works® ..
